Explanation of Abbreviations.

m—Miles. N—North. S—South. E—East. W—West.

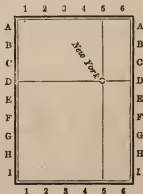

* Location not definitely known.

The figures before names of towns denote population for the year 1879.

When figures for population (are omitted, the place is a settlement of less than 50 inhabitants.

The letters and figures following names, refer to that point on the map at which lines drawn from marginal figures top and bottom, and letters upon either side of map, would cross each other at right angles.

For example, to find "*New York City* D 5," let the diagram below represent the map. *New York* is seen near the crossing of lines D—D and 5—5.

Entered according to Act of Congress, in the year 1879, by
